## Flexible finance for essential assets

---

Keeping your business running effectively means investing in equipment, machinery and vehicles from time to time. However, buying capital assets can stretch your resources, so you might want to avoid significant one-off expenses, or you may not have sufficient cash available when you need it.

Asset finance helps you fund your new equipment in an efficient, affordable and timely way.

Here's how asset finance can help you:

### Fund what you need

You can fund the purchase of a range of capital assets from plant, machinery and vehicles, to office equipment.

### Preserve your capital

Matching the amount you borrow to the useful life of the asset and making the repayments from business revenue protects your working capital.

### Stay in control

We have the ability to provide fixed regular payments over an agreed period instead of paying cash up-front, to help with your budgeting and cashflow.

### Annual Investment Allowance (AIA)

Many businesses can claim an AIA for expenditure on plant and machinery (excluding cars). In many cases (depending on the businesses level of expenditure) this may mean that you can claim your entire expenditure on qualifying items against this allowance. The Maximum amount of the annual investment allowance (AIA) is set at £200,000 and can, subject to your specific business circumstances, provide a meaningful benefit. For information on the allowance and the items that are covered by the AIA visit: [www.hmrc.gov.uk/capital-allowances/plant.htm](http://www.hmrc.gov.uk/capital-allowances/plant.htm)
